Hello!

I have been working as full-stack developer for nearly ten years. My work involved building interactive charts, implementing shared UI libraries, improving User Experience, bringing mockups to life, optimizing load times, debugging uncommon problems, and more.
I have worked remotely in international teams, mentored new hires, and onboarded people onto projects.

✨ I am proficient in:

HTML CSS JavaScript Sass Vue Elm
Go Python Git

I also have professional experience in:

TypeScript React Angular Docker Nginx
Gleam Bash PostgreSQL Django Linux

Past Roles

A stealth startup in data visibility market – Menlo Park, CA, USA 09.2021 – 03.2022
Full-Stack / Frontend Developer Elm Go
- Created a UI library, a web app and a landing page from a set of mockups.
- Created a backend with Auth0, Stripe and HubSpot integrations.
